

Action plan

Practical advice for business

Zarema Chinkhoeva

Russia, Chechen Republic

John Smith Fellow- 2009

London, 9 July, 2009.

The main aims

- To promote business development in the Chechen Republic;
- To provide information and advice for business community;
- To improve entrepreneurs' skills for successful running their businesses

Project objectives

- to create a web-site similar to the web-site of Business Link where I had attachments (www.businesslink.gov.uk). Among practical advice the web-site will include: online workshops, trainings conducted in the business-learning centre of the Chamber of commerce and industry where I am currently employed, online exhibitions, search of business partners, online forums.
- to organize a group of professional business advisers so that to provide face to face consultations .
- to design guides offering practical advice for businesses in all aspects of business.

Expected results

- 1500 entrepreneurs will get online advice
- 500 entrepreneurs will be provided with face to face consultations from business advisers

1000 guides offering practical advice in all aspects of business will be designed

To summarize: 20% of the whole Chechen business community will get direct help from the project

The challenges of small business

- administrative barriers
- Instable federal and regional legislation
- hard access to bank funding
- Low level of entrepreneurs' knowledge about their rights and obligations and running a business.

Project partners

- Business Link
- Chamber of Commerce and Industry of the Russian Federation
- Regional Russian chambers
- Chechen government committee on small business and entrepreneurship
- The members of the Chechen Chamber of Commerce and Industry

Many thanks for attention!

Good Luck!!!
